

Freestyle gives you the freedom to style your bed to meet your personal comfort and storage needs.

Maximum storage capacity is achieved with two large deep drawers at both sides of the bed; in fact this provides more space than a standard chest of drawers. Continental drawers at both sides of the bed allow room for bedside tables. Alternatively, where space is limited, a large deep end drawer or a large capacity storage space with two sliding doors may be the better option.

# Memory Master

The heat sensitive foam softens as it absorbs body heat and allows the mattress to gradually conform to the shape of your body and to distribute your weight evenly across the surface. All parts of the body are properly supported allowing correct alignment of the spine. The spring unit and the visco-elastic foam work in unison so that the mattress compensates for unequal pressures and provides uniform support along the entire length of the body. By delivering optimum back support, Memory Master mattresses help prevent uncomfortable pressure points that cause tossing and turning, resulting in restful, healthy sleep.

Memory Master mattresses contain a deep top layer of visco-elastic slow recovery memory foam.

## Storage options explained

## Choosing your bed

Bedrooms should be a haven for relaxation and rejuvenation, so it is important to have the perfect bed that feels 'just right'. With this in mind, our beds are designed to deliver correct body support, superb levels of comfort and the promise of a perfect night's sleep. However, the level of surface softness is a matter of personal preference as only you can choose your perfect bed.

**Sprung Edge Bases** feature a complete spring unit on top of the base giving a softer feel.

**Guest Beds** feature an underbed which can be pulled out on easy-running castors and raised to the same height as the main bed. By unfolding the self-locking, 'lift 'n' lock' legs under the base, these models transform from a single into a double or twin.

To guide you in this important decision we have divided our core range into two comfort ratings: **Gently Supportive** for those who prefer a slightly softer feel and **Comfortably Firm** for those who favour firmer support. We hope this will enable you to make a more informed choice. Add to this our **Springmaster, Memory Master, Freestyle and Mattress Collections** and there really is a bed for everyone.

### Divan Base Options

The performance and feel of your mattress is very dependent on the quality of support provided by the divan. We offer a choice of bases, all of which will provide both you and your mattress with first class, long-lasting support.

**Platform Bases** provide a firmer foundation.

**Firm Edge Bases** have a spring system contained within a timber frame, giving the base a medium-firm feel.

## Spring systems

**Integra™**  
Continuous spring system provides resilient comfort and support. Prevents roll off and roll together.

**Pocket Spring**  
Each spring is sewn into an individual fabric pocket allowing each spring to move independently and respond to the body's every movement and contour.

**Supercoil®**  
Extra heavy 12.5 gauge Bonnell spring system for extra firmness and support. Supercoil is an Airprung registered trademark.

**Poweredge™**  
Open Coil Spring System with heavy gauge perimeter springs helps prevent roll off.

**Duplex®**  
Two layers of Bonnell springs, twice as many as a traditional mattress, for extra support. Duplex is an Airprung registered trademark.

**Supercoil® Plus**  
Extra heavy 12.5 gauge Bonnell spring system with extra coil to provide superior comfort and support. SupercoilPlus is an Airprung registered trademark.

**Dual Pocket™**  
Two tier pocket spring system for superior support. Each spring is sewn into an individual pocket allowing each spring to move independently and respond to the body's every movement and contour.

**Duraspring™**  
13.5 gauge spring system with high tensile wire for increased performance.

**Trizone®**  
Three phase spring support system offers extra support in the centre lumbar region of the mattress. Trizone is an Airprung registered trademark.

# GENTLY SUPPORTIVE

The Gently Supportive range is designed for those with a preference for a slightly softer feel. This softer, more flexible sleeping surface offers both comfort and support. Our Gently Supportive mattresses contain resilient spring units which provide gentle support and a softer comfort feel than our firmer mattresses.

Each bed within the Gently Supportive collection has different amounts and types of upholstery cushioning, in addition to differing spring systems between some models, so you can choose a feel that's 'just right' for you.

# COMFORTABLY FIRM

For those who prefer or require firmer support we present our specially designed Comfortably Firm range. A combination of comfort layers and heavier gauge spring units deliver a firmer, extra-supportive feel.

Our Comfortably Firm mattresses offer less surface 'give' than our Gently Supportive range. Each bed within the Comfortably Firm collection has a different amount and type of upholstery cushioning, so you can choose a feel that's 'just right' for you.
